42 3.4 ASSUMPTIONS Assumptions in this study were discussed in detail in chapter 1, section 1.7. 3.5 RESEARCH DESIGN The present study is an exploratory, descriptive and contextual qualitative study in

Chapter 3 Research design and methodology - UnisaIR Home
Descriptive research is used to describe characteristics of a population or phenomenon being studied. It does not answer questions about how/when/why the characteristics occurred. Rather it addresses the "what" question (what are the characteristics of the population or situation being studied?)

Descriptive research - Wikipedia
Documents SAS/IML software, which provides a flexible programming language that enables statistical programmers to perform statistical data analysis, simulation, matrix computations, and nonlinear optimization. SAS/IML software offers a rich, interactive programming language with an extensive library of subroutines and enables you to create your own customized function modules.

SAS/IML(R) 13.1 User's Guide
Exploratory research is research conducted for a problem that has not been studied more clearly, intended to establish priorities, develop operational definitions and improve the final research design. Exploratory research helps determine the best research design, data-collection method and selection of subjects. It should draw definitive conclusions only with extreme caution.
