**TRIANGULAR DEVELOPMENT** Triangulation is slower and more difficult than parallel line or radial line development, but it is more practical for many types of figures. Additionally, it is the only method by which the developments of warped surfaces may be estimated. In development by triangulation, the piece is divided into a series of triangles as in radial Line development.

Development of Capitalism in Russia (1898). Lenin, following Marx's 1840s-1860s writings, was a critic of bourgeois political economy and wanted to un-pick the discourse of capitalism in order to be a critic of the capitalist system. We would today say that his work used methodological triangulation of discourse analysis (a
