Integrating sense of place into ecosystem restoration: a

The Social-Ecological Model: ... Looks at the broad societal factors, such as health, economic, educational and social policies, that help create a climate in which violence is encouraged or inhibited and help to maintain economic or social inequalities between groups in society.

The Social-Ecological Model: A Framework for Violence

The ultimate goal is to stop violence before it begins. Prevention requires understanding the factors that influence violence. CDC uses a four-level social-ecological model to better understand violence and the effect of potential prevention strategies.Â¹ This model considers the complex interplay between individual, relationship, community, and societal factors.

The Social-Ecological Model: A Framework for Prevention

An ecological perspective on health emphasises both individual and contextual systems and the interdependent relations between the two. Origins of this approach have emanated from multiple disciplines over the past century or more. This article provides a glossary of perspectives, processes, and settings that pertain to an ecological approach in health research.
