Distributed computing is a field of computer science that studies distributed systems. A distributed system is a system whose components are located on different networked computers, which communicate and coordinate their actions by passing messages to one another. The components interact with one another in order to achieve a common goal. Three significant characteristics of distributed ...

Distributed computing - Wikipedia

Uma rede sem fio (também conhecido pelo termo em inglês wireless network) é uma infraestrutura das comunicações sem fio que permite a transmissão de dados e informações sem a necessidade do uso de cabos – sejam eles telefônicos, coaxiais ou ópticos. Isso é possível graças ao uso, por exemplo, de equipamentos de radiofrequência (comunicações via ondas de rádio), de ...
