A scientific theory is an explanation of an aspect of the natural world that can be repeatedly tested and verified in accordance with the scientific method, using accepted protocols of observation, measurement, and evaluation of results. Where possible, theories are tested under controlled conditions in an experiment. In circumstances not amenable to experimental testing, theories are evaluated ...

Sociology is the scientific study of society, patterns of social relationships, social interaction, and culture of everyday life. It is a social science that uses various methods of empirical investigation and critical analysis to develop a body of knowledge about social order, acceptance, and change or social evolution. While some sociologists conduct research that may be applied directly to ...

The term typology is used in many fields. For example are Carl G. Jung's psychological types famous (). In Library and Information Science (LIS) is typology used, for example about document typologies. Web of Science, for example, distinguishes between article, book review, letter, review, proceeding paper and other types of documents.
