Adobe: Creative, marketing and document management solutions

The Raspberry Pi (short: RPi or RasPi) is an ultra-low-cost (\$20-\$35) credit-card sized Linux computer which was conceived with the primary goal of teaching computer programming to children. It was developed by the Raspberry Pi Foundation, which is a UK registered charity (Registration Number 1129409). The foundation exists to promote the study of computer science and related topics, especially ...

RPi Hub - eLinux.org

File locking is a mechanism that restricts access to a computer file by allowing only one user or process to access it in a specific time.. Systems implement locking to prevent the classic interceding update scenario, which is a typical example of race condition, by enforcing the serialization of update processes to any given file. The following example illustrates the interceding update problem:
