

meteorologia manuale giuliacci pdf

In meteorologia un nubifragio Ã¨ una precipitazione piovosa particolarmente intensa, durante la quale il tasso di pioggia caduta (rain rate) Ã¨ uguale o superiore a 30 mm per ora. Nonostante solitamente abbia una breve durata, data la sua intensitÃ , questo fenomeno Ã¨ in grado di creare condizioni di allagamento e inondazioni, specie in zone predisposte.

Nubifragio - Wikipedia

Le gocce di pioggia sono spesso descritte e raffigurate come a "forma di lacrima", tonde sul fondo e piÃ¹ strette verso la cima, ma questo Ã¨ scorretto (solo le gocce d'acqua che gocciolano da qualche sorgente sono a forma di lacrima al momento che si formano).
