In geometry, an isosceles triangle is a triangle that has two sides of equal length. Sometimes it is specified as having exactly two sides of equal length, and sometimes as having at least two sides of equal length, the latter version thus including the equilateral triangle as a special case. Examples of isosceles triangles include the isosceles right triangle, the golden triangle, and the ...

However, the term "feature" is also commonly used to mean a capability of a system, application or component. Also, in some domains and/or applications no distinction is made between "feature" and the corresponding real-world phenomena. To avoid confusion, we adopt the term "Spatial Thing" throughout the remainder of this best practice document.

A pentagram (sometimes known as a pentagram, pentangle or star pentagon) is the shape of a five-pointed star.. Pentagrams were used symbolically in ancient Greece and Babylonia, and are used today as a symbol of faith by many Wiccans, akin to the use of the cross by Christians and the Star of David by the Jews. The pentagram has magical associations. Many people who practice Neopagan faiths ...
