

research methods and statistics pdf

Descriptive and inferential statistics. Descriptive statistics: helps to describe the characteristics of a sample. Inferential statistics: a collection of methods, which help to quantify how certain we can be when we make inferences from a given sample.

Research Methodology and Statistics Module

Research Methods and Statistics Page 5 Module 1 Statistical Techniques in Social Research 1.1. Statistics Introduction The subject-matter of statistics has to do a great deal with the science of statecraft. The very word "statistics" is said to have been derived from, say, Latin "status", Italian "statista", German

RESEARCH METHODS AND STATISTICS - University of Calicut

A Handbook On Research Methods and Statistics. An example is provided below: While typing the cover page: (i) All typing should be in capital letters (ii) Typing should be in single line spacing (iii) The typing should be placed at the centre of the page. (iv) The spaces above and below the prints must be equal.

(PDF) A Handbook On Research Methods and Statistics

The mean of a data set is a measure of its middle value. Example: The number of nuclear power stations in various countries in 1989. $X = \dots$. To calculate the mean, add all the data values together and divide by the number of values. In statistics it is vital to understand what types of data you are working with.
