HDAC6 is a tubulin deacetylase involved in many cellular functions related to cytoskeleton dynamics, including cell migration and autophagy. In addition, HDAC6 affects antigen-dependent CD4+ T cell activation. In this study, we show that HDAC6 contributes to the cytotoxic function of CD8+ T cells. Immunization studies revealed defective cytotoxic activity in vivo in the absence of HDAC6.

HDAC6 regulates the dynamics of lytic granules in

Welcome. Your future is bright at South Florida State College! Train for a career â€¦ get a head start on a four-year degree â€¦ continue lifeâ€™s education â€¦ in a smart, nurturing environment where the world DOES revolve around you.

A number of significant scientific events occurred in 2014, including the first robotic landing on a comet and the first complete stem-cell-assisted recovery from paraplegia. The year also saw a significant expansion in the worldwide use and sophistication of technologies such as unmanned aerial vehicles and wearable electronics.. The United Nations declared 2014 the International Year of ...

2014 in science - Wikipedia

Science explains everything around us and is without a shadow of a doubt the best subject there is. But often students see it as a list of facts to be learnt about stuff they canâ€™t see. It is up to us as educators to bridge that gap, using relevance, excitement, and great planning to foster a love ...

Classroom ideas: Making science engaging and exciting

A summary of commonly used drug doses is provided in Table 24.1, Table 24.2, Table 24.3, Table 24.4, Table 24.5. These dosages should be used as guidelines, not as firm recommendations. Although guidelines are useful starting points, final determination of optimum doses depends on careful observation of the animal's responses, consideration of experimental needs, and judicious fine tuning.

Preanesthesia, Anesthesia, Analgesia, and Euthanasia

George Malcolm Stratton (September 26, 1865 – October 8, 1957) was an American psychologist who pioneered the study of perception in vision by wearing special glasses which inverted images up and down and left and right. He studied under one of the founders of modern psychology, Wilhelm Wundt, and started one of the first experimental psychology labs in America, at the University of ...

Introduction. Cancer genomes contain not only cancer-causing "driver" mutations, but also many additional accumulated "passenger" mutations that do not contribute directly to the tumor phenotype (Stratton et al., 2009). A key challenge in cancer research is to distinguish the consequential driver mutations from the inconsequential passenger mutations.

Synonymous Mutations Frequently Act as Driver Mutations in

Hopefully, as the framework is now maturing, more such papers will appear. Extent of this site's coverage of the Threshold Concept Framework This bibliography initially reflected the interests of the compiler but, over a decade, has been massively extended to cover most disciplines and topics in which there are published papers on the threshold concept framework.

A tale of two catalysts: Two different borate catalysts for the epoxidation of aldehydes with diazoacetamides can be generated from boron and VANOL (3,3'-diphenyl-2,2'-bi-1-naphthol). That these catalysts are different is demonstrated by a nonlinear study on the relationship of the enantiopurity of the product epoxide versus that of VANOL.

Angewandte Chemie International Edition: Early View

It is a responsibility we are failing to meet. According to statistics from the U.S. Department of Education, the gap in eighth-grade reading and math test scores between low-income students and their wealthier peers hasn't shrunk at all over the past 20 years. (The gap between poor and wealthier fourth-grade students narrowed during those two decades, but only by a tiny amount.)
