In the field of psychology, cognitive dissonance is the mental discomfort (psychological stress) experienced by a person who holds two or more contradictory beliefs, ideas or values. This discomfort is triggered by a situation in which a person's belief clashes with new evidence perceived by the person.

Cognitive dissonance - Wikipedia

Signs and symptoms Cognitive aspects. In cognitive models of social anxiety disorder, those with social phobias experience dread over how they will be presented to others. They may feel overly self-conscious, pay high self-attention after the activity, or have high performance standards for themselves. According to the social psychology theory of self-presentation, a sufferer attempts to create ...

The Psychology of Security. I just posted a long essay (pdf available here) on my website, exploring how psychology can help explain the difference between the feeling of security and the reality of security.. We make security trade-offs, large and small, every day. We make them when we decide to lock our doors in the morning, when we choose our driving route, and when we decide whether we're ...
