In my opinion, just because there is a doctor who is a character in the book doesn't qualify as Medicine and Literature, unless it talks about his/her training, work as a doctor, research, etc. But that's just my vote. So The Murder of Roger Ackroyd has little to do with medicine really; it just has a doctor as a character.

Most, if not all, of U.S. medical doctors, make their clinical decisions based on "normal" laboratory values. If the "normal" laboratory reference range of your important test is between 2 and 8, for example, and yours is a 2.5, most doctors will do nothing for you because they say that it is still within "normal" limits.
