Global Health and Aging - World Health Organization

Global health is the health of populations in the global context; it has been defined as "the area of study, research and practice that places a priority on improving health and achieving equity in health for all people worldwide". Problems that transcend national borders or have a global political and economic impact are often emphasized. Thus, global health is about worldwide health ...

CARE believes that access to quality sexual and reproductive health is both a fundamental human right and a critical development issue. SRHR is a vital component of CARE's work to reduce poverty and social injustice.

Sexual and Reproductive Health and Rights | CARE

Health care or healthcare is the maintenance or improvement of health via the prevention, diagnosis, and treatment of disease, illness, injury, and other physical and mental impairments in human beings. Healthcare is delivered by health professionals (providers or practitioners) in allied health fields. Physicians and physician associates are a part of these health professionals.
