### **Mathematical Journal of Okayama University**

Mathematical logic is a subfield of mathematics exploring the applications of formal logic to mathematics. It bears close connections to metamathematics, the foundations of mathematics, and theoretical computer science. The unifying themes in mathematical logic include the study of the expressive power of formal systems and the deductive power of formal proof systems.

Doaj The Directory of Open Access Journals is a service that indexes high quality, peer reviewed Open Access research journals, periodicals and their articles' metadata. The Directory aims to be comprehensive and cover all open access academic journals that use an appropriate quality control system (see below for definitions) and is not limited to particular languages or subject areas.

### **New Trends in Mathematical Sciences - Ntmsci.com**

In mathematics, computer science and operations research, mathematical optimization or mathematical programming, alternatively spelled optimisation, is the selection of a best element (with regard to some criterion) from some set of available alternatives.. In the simplest case, an optimization problem consists of maximizing or minimizing a real function by systematically choosing input values ...

ACM publications are the premier venues for theoretical and practical discoveries in computing.

### **Publications - Association for Computing Machinery**

The journal publishes research papers and occasionally surveys or expositions on mathematical logic. Contributions are also welcomed from other related areas, such as theoretical computer science or philosophy, as long as the methods of mathematical logic play a significant role.

Software: A zip file of some MatLab source code for a prototype of our Java-based Kalman Filter Learning Tool.; OpenCV includes some Kalman Filter functions, and the Reference Manual includes some introductory prose. (The prose is quite similar to our introductory paper.) The entire library can be downloaded after agreeing to their license. The Reference Manual is in the opencv-doc package.

### **The Kalman Filter**

attention memory The RNN gives an attention distribution which describe how we spread out the amount we care about different memory positions. The read result is a weighted sum. Similarly, we write everywhere at once to different extents. Again, an attention distribution describes how much we write at every location.

### **Attention and Augmented Recurrent Neural Networks - Distill**

This chapter presents a general theoretical framework of human memory and describes the results of a number of experiments designed to test specific models that can be derived from the overall theory.
